EXPERIENCE

Product Engineer

Pulso

Hybrid

May 2026 - Sep 2026

- Built Pulso 2.0's onboarding from scratch, achieving a conversion rate in the top 10% of health apps.
- Shipped UX flows, animations, and detailed microinteractions across the mobile app.
- Built AI-powered enrichment pipelines to transform and validate nutrition data.

Founding Software Engineer

Autonoma AI

Hybrid

Mar 2025 - May 2026

- As the first engineering hire, helped grow the product from \$0 to \$600k ARR.
- Led development of core product surfaces: agent workflows, the step editor, and real-time execution.
- Rebuilt the product from scratch after initial traction to align with the long-term vision.
- Worked across engineering, design, and growth on product launches, demos, and videos.

Ssr Software Engineer

emBlue

Remote

Jun 2024 - Mar 2025

- Led development of Universal Inbox from MVP to production.
- Built a full-stack messaging product integrating WhatsApp, CRM, and automation.
- Designed UX for conversations, onboarding, and chatbot creation flows.
- Worked directly with the CTO on product, architecture, and integrations.

Founding Engineer

Sirvana

On-site

Feb 2024 - Jun 2024

- Scaled the search engine from 0 to 600k+ monthly search queries.
- Owned frontend, design, and UX decisions end-to-end.
- Contributed to a \$100k preseed raise through early product development.

Software Engineer

HOC Academy

Remote

Dec 2023 - Mar 2024

- Built interactive games end-to-end: Sudoku, Word Search, and Codebreaker.
- Designed UI/UX, game logic, and reward systems.

SKILLS

Engineering: TypeScript, JavaScript, React, React Native, Expo, Next.js, Node.js, PostgreSQL, MongoDB.

Design & Product: Figma, Jitter, PostHog, Mixpanel.
